Another 'troll' company interested in the patent (I thought it was about eye-tracking, but it is about the 'swipe' on touchscreen...

May be you should ask John to look at the materials that they have sent?

Hi - it was actually your prior patent (below) that prompted my call. Do you own this patent? If not, can you tell me who does? If so, are you interested in monetizing this patent? Some information below and attached about us.

Hope to do business with you. Cheers, Jon

Acacia Technologies (NASDAQ: ACTG) partners with patent holders to turn their patents into revenue. We do this by licensing their patents. We currently own or control over 100 patent portfolios and have established a long track record of success with more than 550 licenses. Our team includes market analysts, in-house patent attorneys, licensing executives and engineers.

Our partners primarily are individual inventors and companies/organizations of various sizes that are looking to turn their idle patents into revenue but have limited resources to deal with unauthorized users. In a typical arrangement, we become the owner or exclusive licensee of the patent(s), and our partner receives a percentage of our net recoveries from licensing and enforcement and/or up-front cash. Under all of these models, our partner incurs zero (\$0) costs: Acacia bears these. It's all upside for our partners.

Further detail about Acacia attached and at www.acaciatechnologies.com.

Subject: patent question
Dear Mr. Taub,
I have received your voicemail (rather late, since I was away on a trip), regarding
"Using gaze actions to interact with a display" US Patent 7561143.
Please, use this email address (my private one), for further communication.
Looking forward to hearing from you,
Slavoljub Milekic, M.D., PhD
Professor of Cognitive Science & Digital Design
